During construction following measures are to be strictly taken to minimize the effects of dust pollution from building construction site

- Properly covering all building materials stored at site like cement bags, sand, fine & stone chips.
- Using water sprays or sprinklers to keep the dust down during activities such as concreting, plastering, breaking concrete and piling activities.
- Washing the wheels of vehicles leaving the site, if they are carrying mud or waste.
- Putting up solid barriers around the site.
- Properly covering trucks & vehicles that enter and leave the site carrying building materials and building debrises.
- Cleaning and watering the road and footpath adjacent to the site at frequent intervals.
- Using dust bags, spraying water when using stone cutters and making the working area well before using the machineries.

Not burning waste materials at site which causes smoke containing carbon monoxide and a range of poisonous substances.
