Guidelines for Proprietors/ developers/ contractors/architects for prevention of the breeding of mosquitoes in construction sites in different wards of KMC

94 BEERPARA LANE, 700030.

Mr/Ms ANIRUDH MODI
DIR OF M/S. ASIATIC BOARD MILLS PVT LTD.

Gentlemen,

It is to let you know that the risk of potential mosquito breeding at the site/premises you usually visit with you and hereby pursuant to undertake the following preventive measures if you come on a regular basis to keep the site free of mosquitoes:

1. Employ such that every water storage container/reservoir at a weekly interval.
2. If you face any problem in emptying water container/ reservoirs, please come to sprinkle kerosene/ diesel/ oil 2) sprinkle bleaching powder/ oil on little water surfaces @ of 2.5-3 litres per 100 sq ft surface area at weekly intervals.
3. For carrying out the need-based larvicidal work with any of the only 3 materials as your discretion fits, please consult 1 of 3 Kamatek Equipment (Pvt Ltd) capacity) from the open market and select 1-3 drill workers from your end and accomplish the job by employing their services at a weekly interval.
4. Technical handbook for estimating/ keeping only the specified mosquitoes within Vector Control Units of KMC, the book will keep a check/ watch on your collaborated site.
5. If any sort of violations on your part with regard to implementation of the proposed anti-mosquito guidelines is found, legal steps will be initiated by the KMC as per the existing norms.

Please cooperate and help the Health department of KMC towards eradication of mosquito-borne diseases in the city of Kolkata.

Ref: Premise No. 24, Beerpara Lane, Ward No. 94,
Borough – I, P.S. Chitpur, Kolkata – 700030

Respected Sir,

I hereby declare that while executing the works mentioned by us in the notice given u/s 393 & 394 of the KMC Act 1980, I shall comply with the requirements of the section 496 (1) & (2) of the Kolkata Municipal Corporation act 1980 and shall be responsible for making the construction site and premises free of water sanction, free of water collection which are likely to be source for breeding of mosquitoes or in any other respect a nuisance. We also here by give undertaking that all water collections required to be maintained for construction work in places like lift, vats, open drums, foundation pits and walls curing sites after floor casting or such places where water / rain water accumulate shall be drained off / emptied twice by a week to prevent mosquito breeding. We also ensure that all other unusable discarded receptacles like buckets, broken pots, coconut shell etc. are removed to keep the construction premises clean and shall be responsible for such action which helps in breeding of mosquitoes, so that it may not be offensive to the neighborhood or in any other respect a nuisance.

Thanking you.
Yours faithfully,

7. Preventive measures need to be taken for pollution free environment:-

a) Wrap construction area/buildings with geotextile fabric installing dust barriers, or other actions, as appropriate for the location.
b) Apply water and maintain soils in a visible damp or crusted condition for temporary stabilization.
c) Apply water prior to leveling or any other earth moving activity to keep the soil moist throughout the process.
d) Limit vehicle speeds to 15 mph on the work site.
e) Clean wheels and undercarriage of haul trucks prior to leaving construction site.
f) Apply and maintain dust suppression on haul routes.
g) Apply a cover or screen to stockpiles and stabilize stockpiles at completion of activity by water and maintain a dust palliative to all outer surfaces of the stockpile.
h) Stabilize surface soils where loaders, support equipment and vehicles will operate by using water and maintain surface soils in a stabilized condition where loaders, support equipment and vehicles will operate.
i) Stabilize adjacent disturbed soils following paving activities with immediate landscaping activity or installation of vegetative or rock cover.
j) Maintain dust control during working hours and clean track out from paved surfaces at the end of the work day/day. Track out must now extend 50 feet or more and must be cleaned daily, at the minimum.
k) Stabilize sloping surfaces using soil binders until vegetation or ground cover can effectively stabilize the slope.
l) Disposal of debris in consultation with the local authorities following proper environmental management practice.
m) During construction work, including cutting of marbles, ambient noise level should not exceed more than 65 dB(A).

8. Practices to be discarded for pollution free Environment:-

a) Don't dispose of debris indiscriminately.
b) Don't allow the vehicles to run at high speed within the work site.
c) Don't use materials without proper dust control/noise control facility.
d) Don't keep materials without effective cover.
e) Don't allow access in the work area except workers to limit soil disturbance and prevent access by fencing, ditches, vegetation, berms or other suitable barrier.
f) Don't have the soil, sand and cement stack uncovered.
g) Don't keep materials or debris on the roads or pavements.
h) Burning of old tyres in hot mix plant as a fuel during construction and repair of the roads for melting coal tar should be discarded.
