Rainwater harvesting

A rainwater harvesting tank installed in LOGOS would collect the rainwater from the roof and ground floor areas and store them to reuse it for gardening and landscaping. This will not only recharge and enhance groundwater table levels and reduce water flow into drains but also reduce the potable water required for the project, thereby making it water efficient.

Waste and garbage disposal

The organic waste converter at LOGOS will help manage waste in a proper way and convert the kitchen and garden waste to manure and use it for the landscaping.

Limiting water waste

Low water flow fixtures specifically designed to limit water waste will help users reduce water consumption.

Electric vehicle charging points

With rising fuel prices there is and will be a propensity to shift to renewable resources for vehicles. Which is why, the usage of electric vehicles are on the rise. A platinum rated building will have to have electric vehicle charging points to provide occupants the provisions to charge electric vehicles.

Solar power lighting for common areas

Logos will house solar panels. The energy generated from these will be able to cater to the lighting of the common areas of the building. This will make LOGOS immensely energy efficient.

Energy efficient lights

LED lights that consume almost 30% less electricity in comparison to other lights will help LOGOS reduce the energy consumption for the building making it energy efficient.

Adequate light

LOGOS will have windows that are adequately sized to allow a lot of daylight. Better indoor environmental quality will protect health, improve the quality of life, and reduce stress. In a way, it will also escalate the resale value of the office.

Use of sustainable and certified material

A platinum rated building is made of IGBC-rated sustainable products such as FSC certified wood, certified lifts and low VOC paints. The material undergo rigorous scrutiny, and the quality of construction is therefore much superior. This will directly impact infrastructure along with the health and well being of the occupants at LOGOS.
