No.22, Mouza- Uttar Kajirhat, P.O. Bhasa, P.S. Bishnupur, District 24 Parganas (South), under Paschim Bishnupur Gram Panchayat No.1

Ref No. : Your letter dated 08.11.2021

Dear Sir,

We would like to inform you that we have noted that your project is coming in the above said address. We have no objection whatsoever if you construct the proposed project abiding by all the Government rules/statutory obligations.

We would also like to inform you that Panchayat shall not be able to provide water supply for the project but Panchayat has no objection if your company arranges for the construction of deep tubewell with due permission from SWID at your own expense, maintaining all rules and regulations, to meet the water demands.

Regarding treated sewage you will have to install STP on your own and recycle the treated waste water as much as possible and discharge the rest of the treated waste water into the panchayat drain in front of your project.

For storm water, you will have to follow the rules & recommendations of West Bengal Pollution Control Board regarding rainwater harvesting. You may discharge excess storm water into the drain in front of your project.

You will have to install at your own cost and expenses, composting facilities by installing composter at your project site for management of organic component of Municipal Solid Waste and rest part will be disposed of in common Solid waste management site. Our conservancy personnel will collect solid waste from the designated place at your project site. In addition, you will have to follow Municipal Solid Waste (Management & Handling) Rule, 2016 and Plastic Waste Management Rules, 2016 and to comply with all the Statutory Act/Rules and also to abide by those.

This is for your information.

Thanking You,
Yours Faithfully,

Pradhan 29/12
