The Building Information Model (BIM) is a digital representation of the physical and functional characteristics of a building. It is a collaborative process that integrates the project's data into a shared knowledge resource and helps in the decision-making process. BIM is used to create a 3D model of a building, which can be used to visualize and analyze the building's performance. BIM is used to create a 3D model of a building, which can be used to visualize and analyze the building's performance. BIM is used to create a 3D model of a building, which can be used to visualize and analyze the building's performance.

DESIGN OF ALL STRUCTURAL MEMBERS SHALL BE IN ACCORDANCE WITH THE PROVISIONS OF THE NATIONAL BUILDING CODE OF THE PHILIPPINES (NBCP).

ALL BUILDING MEMBERS TO BE PROVIDED AS SHOWN ON THIS PLAN. ALL MEMBERS TO BE PROVIDED AS SHOWN ON THIS PLAN.
