In the second section, the author outlines the various methods used to collect and analyze the data. This includes both primary and secondary data collection techniques. The primary data was gathered through direct observation and interviews with key stakeholders. Secondary data was obtained from existing reports and databases.

The analysis phase involved identifying trends and patterns in the data. Statistical tools were used to quantify the findings, and the results were compared against industry benchmarks. The goal was to identify areas of strength and weakness, as well as opportunities for improvement.
