**EMERGENCY EVAQUATION SYSTEM**

Here in this project for each block we are having 4 tenements in each floor catered by 1 stair which is about 1.85 Mtr. from the main entrance door and around 3.6 Mtr. from the furthest end of the tenement.

Hence we have proposed this staircase for the first way of emergency exit. Apart from this each floor will have a fire extinguisher of ABC type and a Ring Main Hydrant system all around the site.

In connection to this we are having a proper driveway of 4Mt. within the site for the movement of emergency vehicle at any time.
