1. The first part of the report is devoted to a general survey of the situation in the country. It is found that the economy is in a state of depression and that the government has failed to take any effective measures to revive it. The main causes of this depression are the overvalued exchange rate, the excessive printing of money, and the high level of inflation.

2. The second part of the report deals with the foreign trade of the country. It is found that the foreign trade is in a state of stagnation and that the government has failed to take any effective measures to revive it. The main causes of this stagnation are the overvalued exchange rate, the excessive printing of money, and the high level of inflation.

3. The third part of the report deals with the public sector. It is found that the public sector is in a state of stagnation and that the government has failed to take any effective measures to revive it. The main causes of this stagnation are the overvalued exchange rate, the excessive printing of money, and the high level of inflation.

4. The fourth part of the report deals with the private sector. It is found that the private sector is in a state of stagnation and that the government has failed to take any effective measures to revive it. The main causes of this stagnation are the overvalued exchange rate, the excessive printing of money, and the high level of inflation.

5. The fifth part of the report deals with the social sector. It is found that the social sector is in a state of stagnation and that the government has failed to take any effective measures to revive it. The main causes of this stagnation are the overvalued exchange rate, the excessive printing of money, and the high level of inflation.

6. The sixth part of the report deals with the financial sector. It is found that the financial sector is in a state of stagnation and that the government has failed to take any effective measures to revive it. The main causes of this stagnation are the overvalued exchange rate, the excessive printing of money, and the high level of inflation.

7. The seventh part of the report deals with the industrial sector. It is found that the industrial sector is in a state of stagnation and that the government has failed to take any effective measures to revive it. The main causes of this stagnation are the overvalued exchange rate, the excessive printing of money, and the high level of inflation.

8. The eighth part of the report deals with the agricultural sector. It is found that the agricultural sector is in a state of stagnation and that the government has failed to take any effective measures to revive it. The main causes of this stagnation are the overvalued exchange rate, the excessive printing of money, and the high level of inflation.

9. The ninth part of the report deals with the services sector. It is found that the services sector is in a state of stagnation and that the government has failed to take any effective measures to revive it. The main causes of this stagnation are the overvalued exchange rate, the excessive printing of money, and the high level of inflation.

10. The tenth part of the report deals with the overall economy. It is found that the overall economy is in a state of stagnation and that the government has failed to take any effective measures to revive it. The main causes of this stagnation are the overvalued exchange rate, the excessive printing of money, and the high level of inflation.

(11) In the year 1982-83, the Government of India
 decided to start a new scheme for the purpose of
 providing financial assistance to the States for
 the purpose of setting up of small scale
 industries. The scheme was known as the
 Small Scale Industries Development Scheme.
 The scheme was approved by the Government
 of India in the year 1982-83. The scheme
 was aimed at providing financial assistance
 to the States for the purpose of setting
 up of small scale industries. The scheme
 was approved by the Government of India
