

TO WHOM IT MAY CONCERN

This is to inform you all that the development work for the project "Kabya Phase I" at Reckloani has the firefighting facilities which includes fire extinguisher, Red fire bucket, fire bucket stand and other firefighting accessories in each block.

Moreover, it is a MIG Project so we have not used any of the renewable energy system.

Further, the building is G+4 Structure having a height of 15 Metres and all flats have balcony as well as staircase for emergency evacuation.

Furthermore, we have PHE water supply in the locality, for drinking water facilities.

For SOUMITA PROJECTS PVT. LTD.
