**GUIDELINES FOR PROMOTERS/ DEVELOPERS/ CONTRACTORS  
HOUSE-OWNERS FOR PREVENTION OF MOSQUITO BREEDING AT  
CONSTRUCTION SITES IN DIFFERENT WARDS OF KOLKATA  
MUNICIPAL CORPORATION**

To  
Mr/ Ms Rayan Ghosh, Ato Ghosh.  
Mandira Ghosh, Tapati Ghosh.  
Sub ICA of Soujanya Ghosh.

Dated 07/12/20

Sir/Madam,

Preventing mosquito breeding at the said construction site is your sole responsibility. Hence you are hereby requested to undertake the following preventive measures on your own on a regular basis:

- Mosquitoes could breed in as little as half a centimetre of stagnant water. Hence nobody should allow water to stagnate anywhere for more than a week. Remember, an adult mosquito emerges from its egg in a span of 7 days.
- Remove scraps, rubbish and other discarded materials from the construction site on a regular basis.
- Empty each and every water storage container at a weekly interval. If you face problem in emptying any big water container/reservoirs, sprinkle Kerosene/ Diesel/ MLO (Mosquito Larvicidal Oil) on their water surface and the surfaces of all other sites with accumulated water @ of 2.5-3 litres per 100 sq m surface area of the water at a weekly interval.
- For carrying out larvicidal spray at your construction site, please procure 1 or 2 Knapsack Sprayers (16-litre capacity) from the local market and select 1-3 persons from your end for doing need-based spray of diesel/MLO/kerosene based on the area of the construction site. Technical knowhow for sprinkling/ spraying may be obtained from the visiting vector control squad of KMC.
- The vector control personnel of KMC will check the aforesaid construction site by making surprise visits. If any sort of negligence/violation with regard to implementation of the anti-mosquito guidelines prescribed herein is found, legal steps will be resorted to by the KMC authorities as per the existing norms.
- Do please cooperate.
