PROJECT NO. 1000  
 PROJECT NAME: THE DESIGN CELL  
 PROJECT ADDRESS: 24 COOPER STREET, SINGAPORE 049904  
 PROJECT COMMENCEMENT DATE: 10/10/2018  
 PROJECT COMPLETION DATE: 10/10/2019

Don't be afraid to ask for help  
The resolution is the first step  
in solving the problem.

Step 1: Identify the problem  
Step 2: Brainstorm solutions  
Step 3: Evaluate options  
Step 4: Implement the best solution

3. The first step in solving a problem is to identify the problem. This is often the most difficult part of the process, as it requires a clear understanding of the situation and the ability to recognize the underlying issues. Once the problem is identified, the next step is to brainstorm potential solutions. This involves thinking creatively and considering a wide range of options, even those that may seem unlikely or unconventional. After brainstorming, the next step is to evaluate the options and choose the most feasible and effective solution. Finally, the chosen solution is implemented, and the results are monitored to ensure that the problem has been resolved.

Step 1: Identify the problem

Step 2: Brainstorm solutions
