Re.: Proposed G + III Residential Building at 92, Roypur, Kolkata 700 084

Fire Facilities: Fire Extinguisher facility will be installed later.

Drinking water / Potable water: Potable water will be supplied by the local statutory body (The Kolkata Municipal Corporation) for the habitants' usage and necessary arrangement shall be made for its storage by providing underground and overhead water reservoirs (of volumes specified by the statutory body and as shown in the sanctioned building drawings)

Emergency Evacuation system: Evacuation shall be ensured by means of one number of centrally positioned Staircase of specified width of flight in the project. All the apartments open into this staircase directly and it leads to an isolated Entrance Lobby in the Ground Floor, giving access to the abutting road.

A 4 Passenger Elevator shall be provided as well although it is not mandatory for a standalone residential building of such size and height.

Sewerage: The covered sewerage system is there.

Renewable Energy: Not required in this project.

Children Park: There is not sufficient space in this project.

Community Hall: There is no community Hall in this project.

Swimming Pool: There is no sufficient space in this project.
