

NOTES

1. All dimensions are in millimeters unless otherwise specified.
2. The structure is designed for a design life of 50 years.
3. The structure is designed for a design load of 5 kN/m².
4. The structure is designed for a design wind speed of 35 m/s.
5. The structure is designed for a design seismicity of 0.15.
6. The structure is designed for a design fire resistance of 120 minutes.
7. The structure is designed for a design durability of 50 years.
8. The structure is designed for a design corrosion resistance of 50 years.
9. The structure is designed for a design maintenance of 50 years.
10. The structure is designed for a design safety of 50 years.
11. The structure is designed for a design security of 50 years.
12. The structure is designed for a design privacy of 50 years.
13. The structure is designed for a design integrity of 50 years.
14. The structure is designed for a design availability of 50 years.
15. The structure is designed for a design reliability of 50 years.
16. The structure is designed for a design robustness of 50 years.
17. The structure is designed for a design resilience of 50 years.
18. The structure is designed for a design sustainability of 50 years.
19. The structure is designed for a design social responsibility of 50 years.
20. The structure is designed for a design economic viability of 50 years.

NO.	DESCRIPTION	UNIT	QUANTITY	REMARKS
