Natalypally, Sonarpur, Kolkata-700150

FACILITIES TO BE EXECUTED IN THE PROPOSED PROJECT "SANDHA APPARTMENT" HOLDING NO-186, RADHAGOBINDA PALLY, SONARPUR, KOLKATA - 700150 AND THE PROPOSED FACILITIES TO BE PROVIDED THEREOF INCLUDING FIRE-FITTING FACILITIES, DRINKING WATER FACILITIES AND EMERGENCY EVACUATION FACILITY.

All the facilities are mentioned & Shown in the Sanctioned Plan by Rajpur Sonarpur Municipality.

In case of Fire-fitting: We are providing Fire Extinguisher at every floor in the above Project.

In case of drinking water facilities: We are providing Deep Tubewell which is mentioned in Sanctioned plan.

In case of emergency like "Fire" we have trained and updated people not to take lifts which will be shut down, instead people will have to take stairs for evacuation purpose.

In case of Earthquake, Earthquake-resistant designs typically incorporate ductility (the ability of a building to bend, sway, and deform without collapsing) within the structure and its structural members. A ductile building is able to bend and flex when exposed to the horizontal or vertical shear forces of an earthquake.

In case of heavy rains, flooding will not be an issue because the ground is raised which doesn't allow stagnant water to come into the facility.
