

DEVELOPMENT WORK AND PROPOSED FACILITIES

FIRE FIGHTING FACILITIES

An underground water reservoir of 8000 litres capacity is provided beside each Block for emergency use of water in case of Fire.

Fire extinguishers to be provided in common area of each block/building.

DRINKING WATER FACILITIES

A municipal water connection will be provided for each block after completion of the project for Drinking Water. There is also a provision of underground boring well which can pump water directly to the overhead water tank.

EMERGENCY EVACUATION

Each Block has a 12 feet wide passage and stairways which can be used for Emergency Evacuation. Common areas in each floor will have exit signs to guide in case of emergency.

USE OF RENEWABLE ENERGY

The project does not have any provision for use of renewable energy

LIFT

A lift is provided in each block for common use of the flat owners.
