END OF REPORT

#OSS

The diagnosis should be correlate clinically.

This is only a screening test. All reactive result should be confirmed by confirmation test like Neutralization Assay, HBV DNA by PCR etc.
False positive results can be obtained due to the presence of other heterophile antibodies, Rheumatoid Factors and other non - analyte substances.

Comments :

(Immunochromatographic Assay)

HbsAg

Non Reactive

INVESTIGATION

RESULT

REPORT FOR HEPATITIS B- SURFACE ANTIGEN

Associate Code : TR
