

LABORATORY REPORT

DATE: 14.05.2019

PATIENT'S NAME : PRATAP MAITY

AGE : 30 Yrs. SEX : M

REFERRED BY DR. : S.S.K.M

SPECIMEN STUDIED : BLOOD

SEROLOGICAL REPORT

HbsAg [Immunochromatography] : NEGATIVE

This is only a screening test . All reactive/positive samples should be confirmed by confirmatory test .Negative result does not exclude the possibility of HbsAg infection - Possibility of false positive cases can not be excluded.

Anti HCV [Spot/Immunodot] : NEGATIVE

This is only a screening test . All reactive/positive samples should be confirmed by confirmatory test .Negative result does not exclude the possibility of HCV infection - Possibility of false positive cases can not be excluded.

HIV I & II [Immunoconcentration] : HIV I : NON REACTIVE
HIV II : NON REACTIVE

This is only a screening test . All reactive/positive samples should be confirmed by confirmatory test .Negative result does not exclude the possibility of HIV infection - Possibility of false positive cases can not be excluded.

Clinical diagnosis should not be made on a single test result; it should integrate clinical & other laboratory data.
