

# Eskag SANJEEVANI

Unit of Eskag Sanjeevani Pvt. Ltd.

Certificate : MC-2248  
NABL ACCREDITED

<b>Patient</b> : Mr. Bikash Das	PRN	: 90149671	IP No. :-
<b>Age/Sex</b> : 50 Yrs/Male	Visit No.	: SP-1	Date : 22/06/2019
<b>Referred By</b> : DR OF BELIAGHATA ID BG HOSPITAL	Sample Collected	: 22/06/2019 14:08	
<b>Location</b> : OPD	Sample Rcvd. in Lab	: 22/06/2019 14:48	
<b>Sponsor</b> : BELIAGHATA ID & BG HOSPITAL	Reported On	: 22/06/2019 17:40	
<b>Collected At</b> : Upasaya Diagnostic Centre	Processed At	: Upasaya Processing Center	
<b>Lab No.</b> : 0006717319	Status	: <b>Verified</b>	

## IMMUNOLOGY

Name	Value	UOM	Range	Method
HBsAg Elisa ^	0.024		COV: 0.108	ELISA

### Interpretation:

1. Test specimens with absorbance value less than the cut-off value are non-reactive and may be considered as negative for HBsAg.
2. Test specimens with absorbance value greater than or equal to the cut-off value are reactive for HBsAg.

### Comments:

1. The test should be used for detection of HBsAg in serum or plasma only and not in other body fluids.
2. This is the only screening test and will only indicate the presence or absence of Hepatitis B surface antigen in the specimen. All reactive samples should be confirmed by confirmatory test. Therefore for a definitive diagnosis, the patients clinical history, symptomatology as well as serological data should be considered.
3. False positive results can be obtained due to presence of other antigens or elevated levels of RF factor. This occurs in less than 1 % of the sample tested.
